

Ela Township Highway Department
Bill Kruckenberg, Highway Commissioner
23605 N. Echo Lake Road
Lake Zurich, IL 60047
(847) 438-2371
FAX (847) 438-0457

Required with Permit Application

Check made out to Ela Township Highway Department in the amount of

\$2,500.00 for each driveway and ditch

\$2,500.00 for each cutting of road (sewer and/or water)

NOTE -

(If the completed project is within the scope of the permit and damage was not done to the Township right of way, a refund of the bond - \$50.00 inspection/administration fee will be sent to the applicant. Check will be returned within thirty (30) days after final inspection but not within the months of November 1st through April 15th.)

Inspections

(NOTIFY ELA HIGHWAY DEPARTMENT, 24 HOURS BEFORE)

- **Prestart Road Conditions**
- **While culvert is being installed**
- **Any backfill of roadways**
- **Before paving of driveway and/or road**
- **Grass must be planted in ditch, established and mowed twice before final inspection**

General Conditions

If road is in poor condition, you should have a prestart inspection with Highway Commissioner. Pictures are optional. If not inspected before starting, you may be liable for additional repairs.

Driveways must be paved from road to property line (road easement)

If Highway Dept. has to clean road or ditches due to poor site conditions, a fee of \$150.00 per hour per man and machine will be charged to Owner or Contractor

Any violations of the above will result in a red tag – minimum fine of \$100.00 to \$500.00 per incident. Before work continues, the amount of the fine will require payment in a Certified Check.

This means no one will cross easement to work on property if RED TAGGED

ATTACHMENT "A"

1) Standard Specifications -The Illinois Department of Transportation Standard Specifications for Road and Bridge Construction, latest edition shall govern all work, except as modified herein.

2) Traffic Control -This item shall comply with the requirements of Sec. 107.14 of the STANDARD SPECIFICATIONS as modified herein. The Petitioner shall be required to furnish and maintain all signs, signals, barricades and other traffic control devices during the construction or maintenance of an improvement to the satisfaction of the Township Road Commissioner.

3) Roadway Maintenance -This item shall comply with the requirements of Sec. 107.15 of the STANDARD SPECIFICATIONS as modified herein. The Petitioner shall clean the pavement of all dirt, mud and debris at the end of each day's operations, and at other times as directed by the Highway Road Commissioner.

4) Removal and Replacement of Bituminous Pavement -This item shall comply with the requirements of Secs. 218.03 and 617.02 of the STANDARD SPECIFICATIONS as modified herein. Where brick, concrete, or bituminous pavement is cut, the width of the cut shall exceed the actual width of the top of the trench by twelve (12) inches on each side for a total of two (2) feet. Exposed surfaces of Portland cement or bituminous concrete shall be cut full depth with a pavement saw before breaking. Care shall be taken in cutting to insure that a straight joint is sawed.

When the existing pavement surface is bituminous concrete and the base consists of a rigid or flexible material, the base replacement shall consist of six (6) inches of BITUMINOUS AGGREGATE MIXTURE (B.A.M.). The materials, equipment, general conditions, composite, preparation, transportation, placing and compacting of Bituminous Aggregate Mixture shall conform to Articles 218.03 through 218.10 inconclusive. The surface replacement shall consist of a bituminous prime coat and a three (3) inches thickness bituminous concrete surface course class I.

5) Combination Concrete Curb & Gutter Removal and Replacement -All concrete curb and gutter designated for replacement shall be saw cut. The width of the cut shall exceed the actual width of the top of the trench by twelve (12) Inches on each side for a total of two (2) feet. Care shall be taken in cutting to insure that a straight joint is sawed. Three (3) #5 continuous steel rebar shall be spaced evenly at two (2) inches above the base of the replacement curb and gutter section. These rebar shall be held securely in place by coring into the existing curb and gutter on both ends to a depth of six (6) inches and grouting to insure maximum bond. A pre-formed expansion joint conforming to the cross section of the existing section shall be required at both ends of the replacement concrete curb and gutter section. The replacement curb and gutter section shall then be poured and formed to the dimensions and cross sections of the existing curb and gutter.

6) Prosecution of the Work -This item shall comply with the requirements of Sec. 108.03 of the STANDARD SPECIFICATIONS as modified herein. The Township Road Commissioner shall be notified 24 hours in advance of beginning or discontinuing of operations.

7) Certification of Insurance -The Petitioner shall deposit with the Township Road Commissioner a permit application, permit bond and a certificate of insurance in the amount specified by the Road Commissioner to cover the cost of repairing any failures to the improvements occurring for a period of one (1) year after the date of final acceptance .

8) Review Time -The Township Road Commissioner shall require a minimum of _____ days for the purpose of reviewing plans, specifications and permit applications.

ATTACHMENT "A" – Continued

9) Seeding - All sodded areas which have been destroyed shall be reseeded, fertilized and mulched in accordance with the Section 642 and 643 of the Illinois Department of Transportation STANDARD SPECIFICATIONS for Road and Bridge Construction latest edition including all subsequent supplements and revisions.

10) Pavement Opening - All pavement openings shall be replaced on the same day opening is made unless otherwise directed by Township Road Commissioner.

11) Trench Backfill - This item shall comply with the requirements of Sect. 210 01 of the STANDARD SPECIFICATIONS as modified herein. The trench backfill shall be mechanically tamped in layers not to exceed six inches. This backfill shall be brought within 6" of the existing surface. The final 6" shall consist of CA6 as defined in the STANDARD SPECIFICATIONS.

12) Settlement Resurfacing - After 10 days the disturbed portion of the surface shall be cut down equal to the existing surface and replaced with six (6) inches of B.A.M. and three (3) inches of Class 1 bituminous mixture. This resurfacing shall be repeated if directed by the Township Road Commissioner, for a period of at least one year should settlement occur.

13) All adjoining roads shall be kept free of dirt and construction debris. Any dirt or construction debris tracked onto adjoining roads shall be removed as often as necessary through out the course of the day to assure proper and safe travel of the motoring public.

14) Construction worker's vehicles and construction equipment shall be parked in areas outside the Township right of way or in areas where there will be no interference with the normal use of the right of way or vehicle sight distance.
